Summary

Senior Software Developer with 6+ years specializing in React, Next.js, and enterprise front-end practices. Skilled at building efficient, responsive SPAs with a focus on performance optimization, web accessibility, and modern Search Engine Optimization. Proficient in JavaScript/ES6, TypeScript, and Node.js, delivering scalable solutions.

Experience

Bank Of Montreal (BMO)

Senior Software Developer

Toronto, ON

June 2024 - Present

- Worked on migration of pages to a CMS-based architecture using Contentful and Next.js, ensuring seamless performance, scalability, and user experience, with improved and faster page load times
- Developed a suite of quality assurance accessibility tools (accessibility testing for multi-URL analysis and another for real-time debugging), reducing accessibility defects and streamlining compliance testing for inclusive web experiences
- Implemented Algolia tracking analytics as a proof of concept (PoC) to enhance site search insights and data-driven decision-making
- Integrated Qualtrics feedback into the footer for real-time user feedback collection to improve overall site experience
- Led and mentored a team of 5 developers, delivering high-impact features with improved efficiency and code quality

Staples Canada

Senior Frontend Developer

Richmond Hills, ON

September 2023 - June 2024

- Coordinated with cross-functional teams to upgrade the staples React component library with 50+ reusable components, cutting feature development time by 30%
- Implemented Bill 64 compliance, integrating OneTrust to enforce data privacy regulations while collaborating with legal teams to ensure full regulatory adherence
- Optimized cart and checkout flows with React.js, boosting engagement by 20% and conversions by 15%
- Integrated Segment Analytics to elevate data accuracy by 25%, while bolstering SEO with optimized meta tags and structured content, resulting in a 10% surge in organic traffic

Bank Of Montreal (BMO)

Intermediate Frontend Developer

Toronto, ON

April 2022 - July 2023

- Developed landing pages for banking products using React, enabling seamless content updates for various bank accounts, Airmiles calculators, and seasonal campaigns, improving maintainability and efficiency
- Participated in various review activities (e.g., code reviews, requirement analysis, design evaluations) and provided feedback to ensure quality aligning with Web Accessibility Section 508, WCAG, ADA, Rehabilitation Act Guidelines
- Assisted in the deployment and development of OneTrust to ensure compliance with Bill 64 (Quebec's data privacy law), collaborating with legal and security teams to align with regulatory requirements
- Optimized security by implementing XSS (Cross-Site Scripting) mitigation on search pages, partnering closely with cybersecurity teams for penetration testing and compliance audits

Cineplex Entertainment Ltd.

Software Developer

Toronto, ON

January 2019 - January 2022

- Developed and maintained a React, SCSS, and Material UI component library, incorporating headless Agility CMS to deliver immersive movie booking experiences
- Integrated third-party APIs for real-time movie listings, showtimes, and ticket availability, improving user engagement
- Collaborated with designers and backend developers in an Agile setting, producing high-quality features aligned with business objectives and user needs
